This application contains claims directed to the following patentably distinct species:

First species described beginning on page 11, line 8 of the specification

Second species described beginning on page 30, line 2 of the specification

Third species described beginning on page 33, line 27 of the specification

Fourth species described beginning on page 36, line 11 of the specification

Fifth species described beginning on page 60, line 7 of the specification

Sixth species described beginning on page 65, line 8 of the specification

Seventh species described beginning on page 69, line 22 of the specification and an in-determinant number of additional species described beginning on page 71, line 27 of the specification.

The species are independent or distinct because they have mutually exclusive characteristics that require different searches that are burdensome in the limited time the PTO allots for examination.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 appears to be generic, but the examiner is unsure and has not undertaken an exhaustive analysis.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless

accompanied by an election. In the event one of the in-determinant number of additional species described beginning on page 71, line 27 of the specification is elected, applicant is required to provide a proposed drawing correction illustrating it in response to this office action to facilitate examination.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).
